42	The selection of classes is not the problem--it is the quality of district delivery classes which needs to improve. They are canned programs from 20 years ago taught by a body who can read slides. District delivery needs to follow the same format as the academy's other classes--find someone who is an expert on the topic to develop the program and find specific instructors who are enthusiastic and knowledgeable about a topic to teach. Also, there need to be multiple levels or classes, such as pumps 1, 2, and 3. Pumping cannot be taught in one weekend and not everyone can devote the time to take the full motor pump operators class in a month or two. Auto Extrication is another class which should have multiple, progressive, levels.	4/23/2015 12:44 PM

8	Changing the 10 year requirement for PPE would be great. Most departments cannot afford to replace turnout gear every 10 years, and most smaller departments' gear will last longer.	4/30/2015 10:32 AM
9	Need to release the restrictions on structural firefighting class. Used to be able to send recruits to this class as their first live burn. Now we can't because the rules for the class are more strict and new recruits don't have the ability to meet these requirements.	4/30/2015 9:51 AM

15	Set a progressive scale. Fire officers must have XYZ to take FO II. Have CEU's for all Fire Officers, not just Credentialed fire chiefs. The Credentialing in Massachusetts is too easy. Needs to take on a look of Center for Public Safety Excellence. and have the bar raised for those positions. Convene a panel of your peers to evaluate credentialing.	4/29/2015 3:08 PM

27	Certification is not mandated in Massachusetts. It should therefore not be made a prerequisite for any other training. If a person wants to take a particular course they should not be required to have a certification in order to take it.	4/23/2015 3:09 PM
